

Report

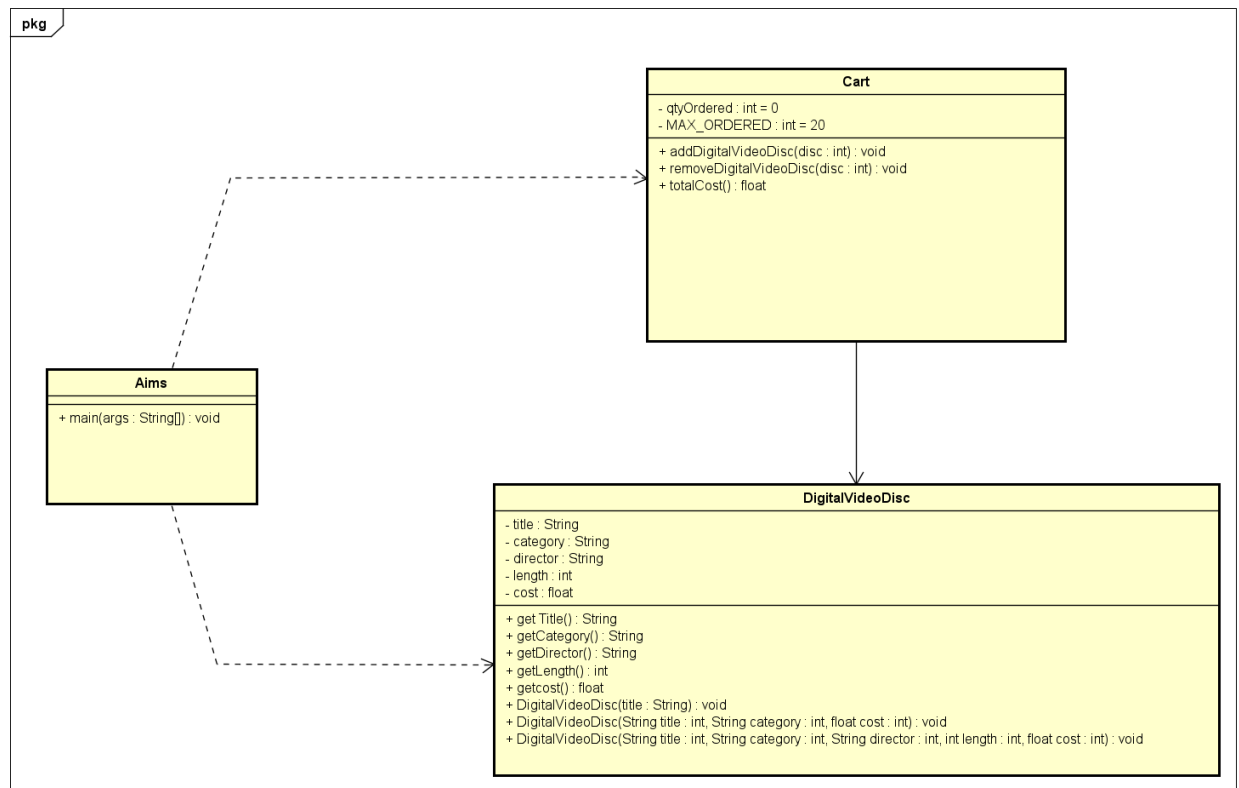

Student name: Bùi Nam Khánh

Student ID: 20232135

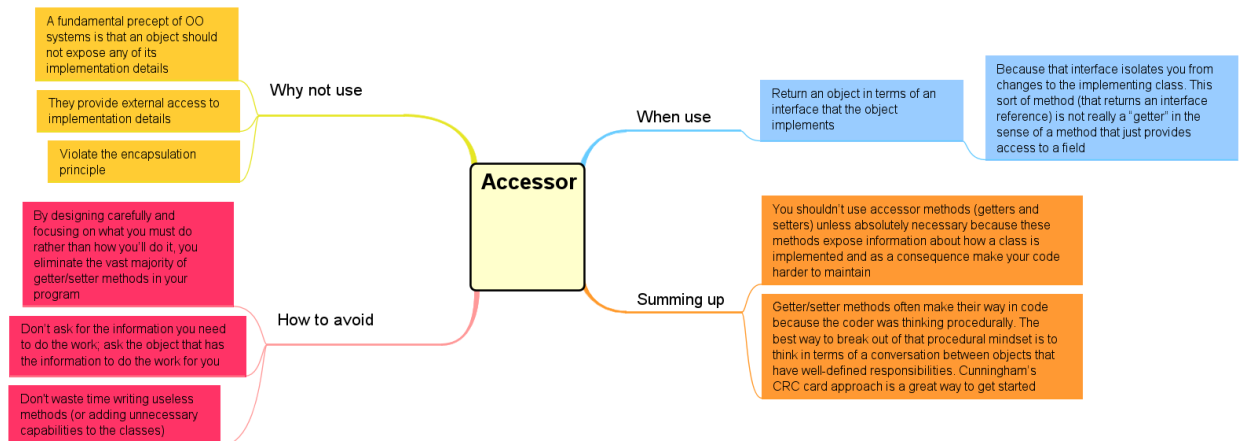

I. Use case diagram

II. Class diagram

III. Reading assignment

IV. Answering question

- If you create a constructor method to build a **DVD** by title then create a constructor method to build a **DVD** by category. Does JAVA allow you to do this?
- JAVA can't differentiate 2 String to determine which one is title, which one is category, it only considers the data type (String). So on that, we can't create 2 method taking a String as the only one parameter.
